

Idealism

Spiritualism

Absolutism

Dialectics

Universal Altruism

Teleology

* Idealism :- it means, conception of Reality.

For idealist, idea is Real.

* Political Idealism — its a political Philosophy which gives primacy to the state over individual. Political Idealist do not give rights, they only Demand duties.

* Spiritualism :- idealist will support spiritualism.

The term spiritualism comes from spirit. Spirit is a Western Concept, Soul is Indian Concept.

& Soul represent total / complete.

Spirit represent motion. A/c to western concept spirit is evolving. Normally, the concept of spirit is linked to God.

A/c to Hegel, this world is in the state of Motion.

Reason of Motion!:-

- Movement of Spirit.

* Absolutism!:-

- it means complete powers to the state. i.e why Karl popper calls Hegel enemy of open society.

* Dialectics!:-

- it means contradiction / opposition..

* Altruism!:-

- it means working in the interest of All.
Opposite of Altruism is Egoism.

* Universalism!:-

- which is found everywhere.

* Teleology!:-

- Everything moves towards its Final Cause.
- it also means specific direction in History.

For. eg :- As per Hinduism, Human history has

4 Phases!:-

- i) Satyug
- ii) (Dwapar)
- iii) (Treta)
- iv) Kalyug

& at the end "Pralay."

(2)

"State is a March of God on this Earth"
— Hegel.

— Above statement gives Hegel's view of Human history.

Human History — it means humans life is

changing. This world is a world of change.

it means everything is changing at every moment.

We don't realise the change because it is so universal.

• idea is the moving force of History.

What is the Reason behind change OR motion? —

— Reason is God.

Who is God? —

i) If we talk with reference to Aristotle, God is unmoved mover.

↓ it means cause behind all motions.

Cause means Reason.

What is God? —

— God is Absolute Reason. it means only idea/Reason.

— God means Perfect idea.

Is any idea is Idea? —

— No, only perfect idea is Idea.

In short, Idea is the moving force of History.

— & Reason is also the moving force of History.

it means there is a Rational Plan in History.

it means History moves q/c to Rational Principles.

Hence, we can understand the laws of History.

How ? -

- By application of Reason.

Q/ Whether History is unpredictable w/c to above

Theory ? -

- No, because we can know the laws of History.

Universalism :-

- it means Everything in this world is a reflection of God/spirit.

Thus, God is a Universal spirit. The spirit of God is found in Everything. it mean even in Non-living things. (Eg - mountains, Rivers, etc.).

* Human History :-

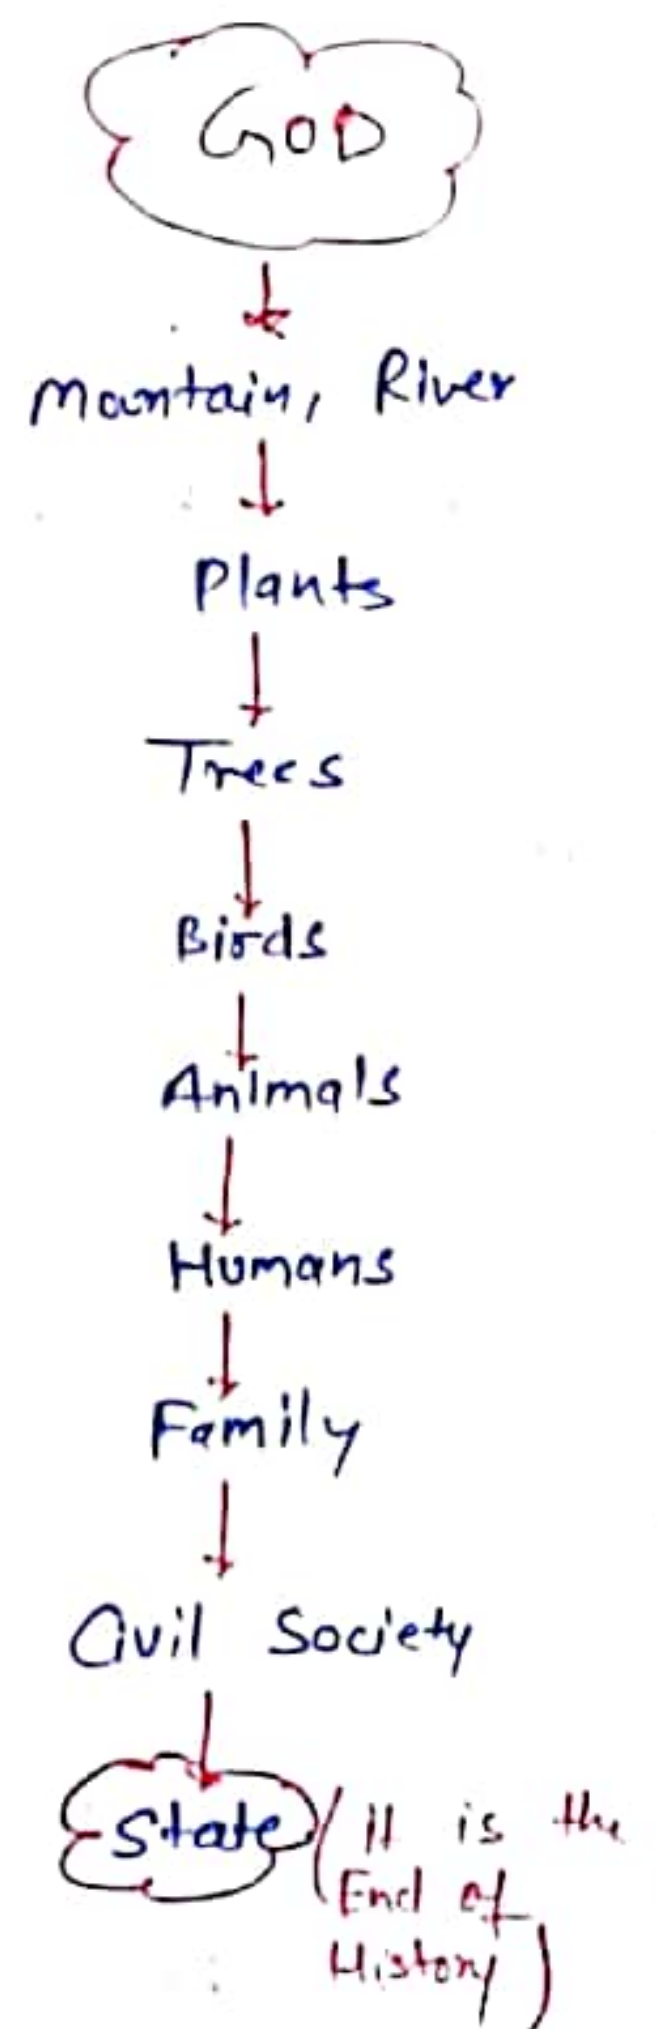

- God has created Non-living things.

⇒ State is the end of History. it means now motion is ending & Gods not move.

In state, God/spirit is present in maximum amount

- it also shows that State is highest of all Associations.

Thus, Hegel will not recognise International Organisation OR International Law. It's a source of inspiration for "Hitler", "Mussoolinee".

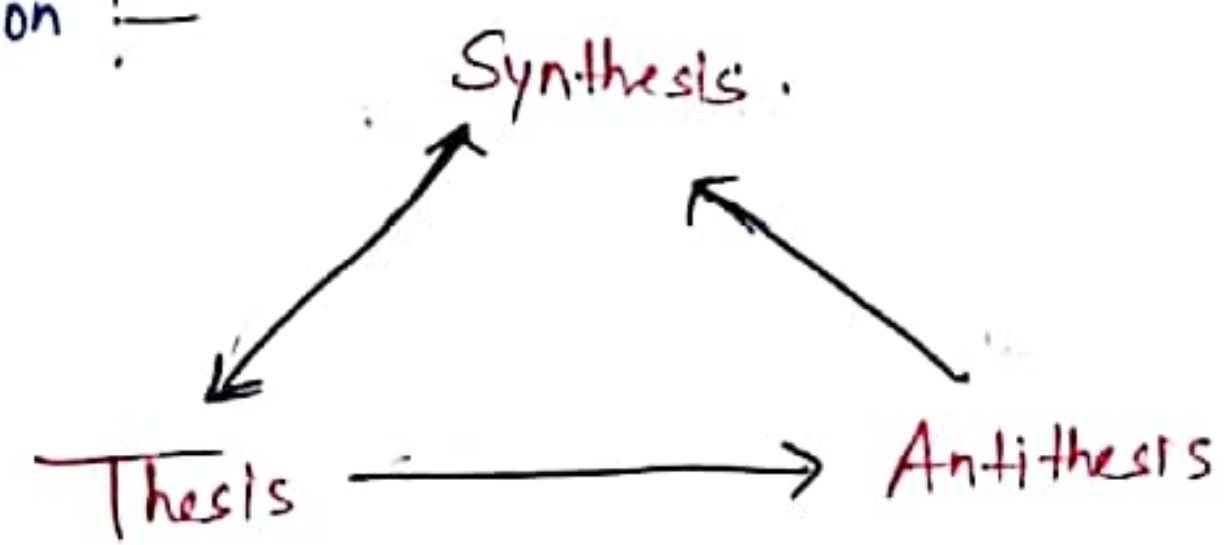

Concept of Dialectics :-

- i) The concept of Dialectics was first given by Socrates.
- ii) Dialectics meant Rational Debate.
- iii) The purpose of dialectic was to understand the truth.

How ? -

- By Eliminating Contradictions.

• Normally, dialectical Reasoning is explained the equation :-

Is synthesis a balanced view ? -

- No, its a Correct View.

Is synthesis is compromised ? -

- NO.

Is synthesis is a Conclusion ? -

- Yes.

NOTE:- For Hegel, "History is progressive."

it means Every next stage is more developed or evolved than the previous stage.

• India is Pessimistic.

What Hegel did with the concept of Dialectic? —

- Hegel used the concept of dialectic to explain the nature of movement in History.

What is the cause behind History —

- Idea / God / Reason is the cause.

What is the manner in which idea move? —

- Idea moves in a "dialectical manner."

Features of Dialectical Motion! —

- To explain the features of dialectical motion, Hegel has given 3 laws of dialectics.

i) Unity of opposites. — in everything of this world there is a unity of opposites.

Ex — in every material things exist its opposite i.e. Idea. it means Idea and matter co-exist.

What is the impact of Unity of opposites? —

— Struggle. it means co-existence is not possible.

- Because of struggle things move.
- Struggle is a cause of motion.
- Struggle is internal.

What is uniqueness of dialectical motion? —

- There are 2 types of motion: —

a) Mechanical

b) Dialectical

⑥

7

a) Mechanical — (Hobbes)

- Here, Cause is External.

b) Dialectical —

- Here, Cause is Internal. It happens on its own. & it is internal because of unity of opposite.

ii) Negation of Negation !—

- it means Negativity destroys itself.

- Law of Nature is "Negation of Negation."

It means world will move toward "bigger truth" & ~~better~~ "lesser truth" will keep on decreasing.

iii) Quantity changes into Quality !—

it means small changes happen.

Tiny Changes $\longrightarrow$ Remarkable Results.
— James Clear.

Quantitative changes means lesser change
while, Qualitative changes means Complete changes

- It means, initially changes are less in Quantity,
gradually Change will become so much that
it will appear as something new.

↳ it means no connection
with the past.

Whether New is entirely New ?—

- No.

- New is rooted in old.

- New is not entirely new, it only appears New.

It means that every New stage is connected
to the previous stage. means "New has a
origin in Old."

The point at which Quantity changes into Quality is called Revolution.

Revolution is a Qualitative change / Complete Change.

Application of laws of Dialectics in Human History:-

⑧

Family → Civil Society → State

+	=	Altruism		+	=	Universalism	⇒	Universal Altruism
-	=	Particularism		-	=	Egoism		(Here, opposition / motion Ends).
